

WASHINGTON D.C. / NEW YORK, NEW YORK / JANUARY 2022

Media visionary and creative entrepreneur, Martine N. Dubin, has been inducted into the Explorer's Club, a fellowship of the world's greatest explorers and advocates supporting scientific expeditions of all disciplines. Martine is one of the few female members to be indoctrinated and recognized by the Club since its creation in 1904.

Martine's life and career has embodied the essence of adventure, exploration of science and anthropology, new innovation and the spread of global consciousness. Through the Martine Dubin Company and CORE TV Network, Martine proves an unwavering passion to document and share stories which encourage change for the betterment of our world and inspire unconventional thought.

*"It is the highest honor to be considered a member of the Club and members being the first to land on the Moon, first to reach both poles, and the deepest ocean. Especially with today's fast-changing realities hiking a threshold of health, economic, climate and social crisis, joining forces with explorers who discover and conserve the natural marvels of the world around us, is now more important than ever before!" - Martine Dubin*

Through her addition to the fellowship, she hopes to provide creative media leadership and facilitate new ideas that will educate and connect the world to the explorations and innovative discoveries of its members.

**ABOUT MARTINE DUBIN** | Martine Dubin is a Media Entrepreneur, active in the industry for 25+ years. She founded the independent digital tv network CORE, and built out a viewer base that has tuned in from every country in the world. She is passionate about redefining media by creating honest and relevant content, and connecting viewers directly with the stories of the most relevant thought leaders in the world. Martine and her company have produced and shot across the globe; from the overgrown temples of Angkor Wat in Cambodia, climbing the erupting Mount Batur Volcano in Indonesia, the Thar Desert in Rajasthan, the Mayan temples of the Yucatan, the Negev Desert in Israel to the Bollywood studios in India, the NATO headquarters in Brussels, NASDAQ Marketsite on Times Square, the Grand Canyon, Joshua Tree to the deep freezing temperatures of Northern Canada. She's been recognized by Origin Magazine as one of the Top 100 Creatives Making a Difference and described by OM Times as The Vision Behind Original Entertainment.
